

# ADVANCES IN Ophthalmology and Optometry

## CONTENTS

VOLUME 3 • 2018

**Editorial Board** **vii**

**Contributors** **ix**

**Preface** **xxiii**

Myron Yanoff

## **Section I - Optometry**

### **Optimizing Visual Performance for Sport**

Graham B. Erickson

Introduction	1
Assessment options	2
Refractive options	5
Myopia	5
Astigmatism	5
Hyperopia	5
Anisometropia	6
Filter options	8
Neutral gray	8
Yellow-brown range	8
Green range	9
Red range	9
Blue range	9
Polarized filters	9
Nutrition options	10
Visual effects	10
Neural effects	10
Athlete recommendations	11
Sports vision training	11
Component skill training	12
Naturalistic and virtual reality training	13
Traumatic brain injury in sport	16
Summary	16

### **Artificial Intelligence and Its Applications in Vision and Eye Care**

Louis J. Catania and Ernst Nicolitz

Prologue	21
Introduction	22
What is artificial intelligence?	23
Comparing artificial intelligence neural networking (“machine learning”) with the human brain	25
Visual system as an artificial intelligence neural network	27
A practical, lighthearted illustration of artificial intelligence and an expert system (or “how a great steak and artificial intelligence can save you money”)	28
Applications of artificial intelligence and robotics in vision and eye care	29
Vision, refractive care, and blindness prevention	29
Cornea and ocular surface	30
Anterior segment	31
Retina	31
Glaucoma and neuro-ophthalmic disorders	32
Immunotherapy, genetics, and stem cell therapies	32
Robotic interfacing	33
Practical suggestions and planning for artificial intelligence and robotics in clinical environments	33
Summary	35

## **Vision Therapy and Virtual Reality Applications**

Dan L. Fortenbacher, Alyssa Bartolini, Brian Dornbos, and Tuan Tran

Introduction	39
The evolution of vision therapy for binocular dysfunction	40
The efficacy of vision therapy	41
The role of vision therapy in binocular vision dysfunction	41
Importance of office-based vision therapy with home-based support activities	46
Problems with home-based models: boredom and poor compliance	48
Virtual reality in vision therapy: past, present, and future	50
History of virtual reality	50
Current applications of virtual reality in vision therapy	51
How virtual reality works	52
Virtual reality in vision therapy used in vision rehabilitation for traumatic brain injury or mild traumatic brain injury	54
Future of virtual reality in vision therapy	55
Summary	55

## **Section II - Pediatric**

### **Prediction Models for Retinopathy of Prematurity**

Lisa Lin and Gil Binenbaum

Introduction	61
Insulin-like growth factor-1, growth, and retinopathy of prematurity	62
Prognostic model development and complexity	63

Postnatal growth-based retinopathy of prematurity models	64
Weight, insulin-like growth factor-1, neonatal retinopathy model	65
ROPScore	66
Premature Infants in Need of Transfusion retinopathy of prematurity and CHOP ROP	66
Colorado Retinopathy of Prematurity model	66
Sample size: an important limitation	67
Generalizability: a second important limitation	67
Other approaches to screening for retinopathy of prematurity	68
Benefits and future studies	69

## **Collagen Cross-Linking in Children**

Katie M. Keck and Erin Stahl

Introduction	75
Significance	76
Corneal collagen cross-linking technique and procedure	76
Review of published studies	77
Studies reporting 1-year outcomes after collagen cross-linking	77
Studies reporting long-term outcomes after collagen cross-linking (<1 year)	80
Current relevance	82
Management of ocular comorbidities	82
Future directions	83
Timing of treatment	83
Efficacy of transepithelial and accelerated collagen cross-linking	83
Summary	84

## **Automated Vision Screening**

Ahmed M. Kassem

Introduction	87
Statistics of vision screening	88
Guidelines and recommendations	88
Automated vision screening devices	88
Off-axis photoscreeners	90
The MTI vision screener	90
iScreen 3000	90
Autorefractors	91
Retinomax	91
SureSight	91
SPOT vision screener	92
Plusoptix	93
2 WIN	93
Smartphone-based vision screeners	94
GoCheck Kids	94
Svone	94
Retinal birefringence testing	94
Pediatric Vision Scanner	94

Visual evoked potential testing	95
Enfant II	95
Relevance and future avenues	95
Summary	97

## **Section III - Ophthalmic Pathology & Ocular Oncology**

### **Localized Toxicity from Intraocular Chemotherapy in Retinoblastoma**

Ramsudha Narala, Kaitlin Kogachi, and Jesse L. Berry

Introduction	102
Significance	102
Intravitreal melphalan	103
Intravitreal topotecan	105
Present relevance and future avenues	108
Dosing of chemotherapeutic drugs	108
Risk factors for intravitreal melphalan-associated retinal toxicity	109
Summary	111

### **Topical Chemotherapy and the Evolving Role of the Biopsy for Ocular Surface Squamous Neoplasia**

Christine Greer, Ashley Polski, and Jesse L. Berry

Introduction	116
Surgical biopsy and the management of ocular surface squamous neoplasia	116
Advantages of conjunctival biopsy for ocular surface squamous neoplasia	118
Disadvantages of conjunctival biopsy for ocular surface squamous neoplasia	119
Is biopsy necessary?	120
Nonsurgical diagnosis of ocular surface squamous neoplasia	121
Nonsurgical treatment of ocular surface squamous neoplasia	123
Mitomycin-C	124
5-Fluorouracil	126
Interferon $\alpha 2b$	129
Summary	133

### **Evidence for Dose De-escalation in Brachytherapy for Choroidal Melanoma**

Bao han A. Le, Rima Patel, Richard Jennelle, and Jesse L. Berry

Introduction	140
Discussion	141
Different methods of dose reduction	143
Prescription dose reduction is associated with good local tumor control and visual outcomes	145

Prospective trials of dose de-escalation in other forms of radiotherapy for uveal melanoma	146
Clinical significance and future directions	148
Clinical significance of dose reduction	148
Need for prospective clinical trials	148
Summary	149

## **Section IV - Vitreoretinal Disease**

### **Recent Innovations in Drug Delivery for Retinal Diseases**

Peter Belin, Ashley Khalili, Robin Ginsburg, and Ronni M. Lieberman

Introduction	155
Pharmacology of the eye	156
Topical	157
Periocular	158
Suprachoroidal	159
Subretinal	160
Intravitreal	160
Treatment options by route of delivery	160
Topical	160
Periocular	162
Intravitreal injections	162
Intravitreal implants	162
Reservoir devices	172
Encapsulated cell technology	174
Iontophoresis	174
Electroporation	175
Sonophoresis	176
Microneedles	176
Self-deploying devices	177
Summary	178

### **Advances in Retinal Imaging**

Jonathan P. Greenberg, Lucy Sun, and Ronni M. Lieberman

Introduction	185
Adaptive optics	186
Quantitative fundus autofluorescence	188
Wide-field imaging	189
Swept source optical coherence tomography	191
En face optical coherence tomography	192
Optical coherence tomography angiography	194
Intraoperative optical coherence tomography	196
Handheld optical coherence tomography	196
Microscope-integrated optical coherence tomography	197
Portable retinal imaging	199
Summary	200

## **Geographic Atrophy: Current Therapeutic Approaches and Potential Treatment Modalities**

Ahmed Bilal Sheikh, Andrew Lee, Adnan Mallick, and Ronni M. Lieberman

Introduction	205
Modulators of inflammation and the complement cascade	206
Neuroprotective agents	207
Vasodilators	210
Laser therapy	211
Stem cell therapy	212
Implantable miniature telescope	213
Summary	213

## **Section V - Glaucoma**

### **Excimer Laser Trabeculostomy, Laser-Based Minimally Invasive Glaucoma Surgery**

Michael S. Berlin, Gaithrri Shanmuganathan, and Maayan Agam

 Video content accompanies this article at <http://www.advancesinophthalmology.com>.

Excimer laser trabeculostomy	218
Introduction	218
Significance	219
Present relevance and future avenues	221
Summary	225

### **Needle Revision of Filtration Blebs**

Alfred M. Solish

 Video content accompanies this article at [www.advancesinophthalmology.com](http://www.advancesinophthalmology.com).

Introduction	229
Needling for failed or failing filtration surgery	230
Needling for bleb leaks	232
Needling for problems with bleb size or shape	232
Needling and glaucoma implants	235
Needle revision techniques	236
Venue	236
Antimetabolites	237
Complications of needle revision	238

### **Glaucoma Refractory to Maximum Medical Therapy**

Jeffrey Freedman

Introduction	243
--------------	-----

Management of glaucoma refractory to medical treatment	244
What to use and why	244
Sequential use of glaucoma procedures used in glaucoma refractory to medical therapy	247
Laser procedures	247
Surgical procedures	248
Bleb fibrosis	249
Tube shunts	251
Cyclodestructive procedures	254
Discussion	255
Summary	257

## Section VI - Neuro-ophthalmology

### Cranial Nerve Palsies: What's New?

Anita A. Kohli, John Woo, and Madhura A. Tamhankar

Introduction	261
Significance	262
Anatomy	262
Cranial nerve palsies	263
Present relevance, future avenues, and conclusions	269
Evaluation of patients with ocular motor palsies	269
Treatment	274

## Section VII - Cornea and External Diseases

### Small-Incision Lenticule Extraction

Majid Moshirfar, Orry C. Birdsong, Yasmyne Ronquillo, and Joshua Tanner

 Video content accompanies this article at <http://www.advancesinophthalmology.com>.

Introduction	280
Significance	280
Applicability of small-incision lenticule extraction	283
Refractive outcomes	283
Efficacy	283
Predictability	286
Safety	286
Postoperative inflammation	289
Higher-order aberrations	290
Corneal nerve integrity	290
Corneal biomechanical strength	290
Relevance/future avenues	292
Postoperative enhancement	292
Other benefits and/or limitations	292

Complications	293
Future possibilities	294
Summary	296

## **Femtosecond Laser-Assisted Keratoplasty**

Ijeoma Asota and Marjan Farid

Introduction	303
Significance	305
The femtosecond laser technology	305
Laser trephination configurations	305
The procedure	308
Femtosecond laser-assisted penetrating keratoplasty	309
Femtosecond laser-assisted lamellar keratoplasty	309
Femtosecond laser-assisted endothelial keratoplasty	310
Future directions	310
Summary	311

## **Section VIII - Oculoplastics**

### **Nonspecific Orbital Inflammation**

Robi N. Maamari and Steven M. Couch

Introduction	315
Historical description and terminology	316
Significance	316
Pathogenesis	317
Pathology	317
Clinical subtypes	319
Diagnostic evaluation	323
Treatment	326
Current clinical relevance and future advances	331
Summary	332

### **A Logical Approach to Bony Orbital Decompression Surgery for Thyroid Eye Disease**

Shirin Hamed Azzam, David Verity, and Geoffrey Rose

Introduction	337
History	338
Practical and anatomic considerations	339
A logical approach to orbital decompression for thyroid eye disease	340
Fulminant active thyroid eye disease	340
Inactive thyroid eye disease	346
Orbital congestion: hydraulic disease	349
Further aspects	350
Extraocular muscles may enlarge after orbital decompression	350
The choice of decompression	350

Fat orbital decompression	351
Discussion	351
Summary	353

## **Facial Paralysis: Diagnosis and Management**

Natalie Homer and Aaron Fay

Introduction	357
Content	358
Facial nerve anatomy	358
Etiology and presentation	358
History	361
Physical examination	362
Facial nerve grading scales	363
Periocular zones	363
Ancillary testing	367
Long-term sequelae	367
Treatment	368
Acute phase	368
Intermediate phase	369
Chronic phase	369
Summary	371

## **Section IX - Uveitis**

### **Autoimmune Retinopathy: Challenges in Diagnosis and Management**

Saghar Bagheri and Lucia Sobrin

Introduction	375
Significance	377
Diagnostic criteria	378
Antiretinal antibodies	379
Excluding other diseases and the role of genetic testing	379
Work-up for malignancy	380
Treatment approaches	380
Monitoring treatment response and disease progression	381
Present relevance and future avenues to consider or to investigate	381
Avoiding delayed diagnosis of autoimmune retinopathy	381
Toward nuanced, accurate interpretation of antiretinal antibody test results	381
Unraveling which antiretinal antibodies are pathogenic	382
Going beyond antiretinal antibodies for the diagnosis of autoimmune retinopathy	382
Toward more effective treatments of autoimmune retinopathy	382
Role of adaptive optics imaging in autoimmune retinopathy	383
Monitoring disease response	383
Summary	383
Autoimmune retinopathy: a diagnostic challenge	383
Novel methods to characterize antiretinal antibodies	384

Autoimmune retinopathy: a treatment challenge	384
Treatment monitoring and duration	385

**Polymerase Chain Reaction in the Diagnosis of Uveitis**

Alejandra M. Maiz and Pooja Bhat

Introduction	389
The polymerase chain reaction	390
A brief history	390
What is required for the reaction and how it is performed	390
Evolution of polymerase chain reaction	391
Current uses for polymerase chain reaction in uveitis	391
Infectious causes of uveitis detectable via polymerase chain reaction	391
Noninfectious causes of uveitis detectable via polymerase chain reaction	397
Sensitivity and specificity of polymerase chain reaction	399
Advantages and limitations of polymerase chain reaction in comparison with other diagnostic methods	399
Future of polymerase chain reaction in uveitis	401
Summary	401

**Section X - Cataracts**

**Intraocular Antibiotics as Endophthalmitis Prophylaxis in Routine Cataract Surgery: Current Practices and Controversies**

Kelly Williamson

Introduction	407
Antibiotic selection	409
Cefuroxime	409
Moxifloxacin	410
Vancomycin	410
Transzonular and intravitreal injection	412
Comparisons, concerns, and current practices	414
Summary and future directions	417
